

Press Release for Immediate Release

Curtis Arnold joins REBTECH as Completions Manager

SEPTEMBER 6, 2013 -- Bedford, TX –Night vision leader, REBTECH has announced that Curtis Arnold has joined the company as the Completions Manager and will be based in Bedford, Texas. Arnold’s primary responsibility will be to manage the project completions in addition to providing technical support and expertise for the company’s innovative night vision and lighting programs.

In addition to holding an A&P maintenance certificate with IA authorization, Arnold holds a commercial pilot certificate with single and multiengine instrument airplane ratings. Arnold has over 21 years of aviation experience and most recently managed a local Dallas/Ft. Worth area aviation maintenance facility.

Company president, Richard Borkowski commented, “We welcome Curtis and his broad base of experience and look forward to what we know will be a significant contribution to REBTECH and our comprehensive product offerings.”

About REBTECH

REBTECH, also known as, REB Technologies, Inc. is a global industry leader providing advanced military and civil night vision aircraft lighting systems. Based in Bedford, Texas, the company has extensive experience developing night vision lighting for cockpit, cabin and crew stations as well as night vision systems for external airframe applications.
