Controlled Capabilities List Manual

Document Number: CCL001 Rev C

**FAA Repair Station No.
MVVR049L**

**REB Technologies, Inc.
1500 Brown Trail
Bedford, TX 76022**

Log of Revisions

If revisions are required to this document, the entire document will be updated and re-released. As such, all pages will be at the revision level annotated in the table below. New items added to the Controlled Capabilities List will be denoted with an alpha designator located in the “change” column. “N” will denote new document added, “R” will denote existing document revised, and “D” will denote existing document deleted. Items that have not been changed since the last revision of the Controlled Capabilities List will have nothing denoted. Any other changes to the document will be denoted by italics.

Rev	Affected Pages	Description	Date	Accepted
IR	All	Initial Revision	11/11/14	K Nimmo
A	2, 4-16	Updated Log of Revisions, Section 1.0, and Section 2.0. Updated Specialized Services and Accessory Lists.	5/15/15	K Nimmo
B	6-18	Updated Specialized Services and Accessory Lists.	9/1/15	K Nimmo
C	4-19	Updated Section 1.0 and 2.0. Updated Specialized Services and Accessory Lists.	5/23/16	D. Montie

NOTE: Change to the Controlled Capabilities List will not require revision to the Repair Station Manual or Controlled Capabilities List Manual.

1.0 INTRODUCTION

The following procedures have been established in order to serve as control procedures for an FAA *accepted* Controlled Capabilities List. This Controlled Capabilities List shall be maintained by the Quality Manager.

The FAA shall receive, within 3 days, all new revisions for acceptance. Revisions to this document will require revisions to the procedures denoted in this document. Quarterly addendums shall be submitted denoting any changes to the units listed in the capabilities list along with change status, and do not require this document to be revised.

This program is intended to allow the repair station to submit a list of accepted repair capabilities to the FAA by listing a part number and/or process specification of the component to be repaired on the Controlled Capabilities List and submitting it to the controlling FAA facility. The Quality Manager will ensure that the repair station has the required capabilities with regard to trained qualified personnel, technical data, adequate tools, and equipment to perform the repairs. The Quality Manager shall submit a new repair Controlled Capabilities Listing to the FAA on a quarterly basis, per calendar year, if new revisions are required. Repairs can begin once the audit form is completed, while waiting for final acceptance from the FAA on the next revision of the Controlled Capabilities List.

A revision system has been established in order to maintain this Controlled Capabilities List in a current status. This revision system is separate from the one used to control the repair station's Repair Station Manual and will be used to insure the currency of the Controlled Capabilities List.

The repair station will prepare a change to the Controlled Capabilities List by listing the component repair by part number and/or process specification to the *accepted* Controlled Capabilities List and a revision page will be initiated. The list of effective pages and table of contents will be changed to reflect the current change, if necessary. This Controlled Capabilities List revision system will allow a revision to the Controlled Capabilities List without revising the Repair Station Manual.

On the next scheduled surveillance inspection by the FAA, the Principal Inspector (PI) will verify the repair station's capabilities for the repair in accordance with Part 145 and the Controlled Capabilities List program. If satisfactory, the PI will sign the List of Effective Pages thereby completing the accepted process.

The repair, alteration, or overhaul of all components will be performed in accordance with all current Federal Aviation Regulations, manufacturer's data,

drawing, specification, bulletins and other technical data accepted by the administrator. This repair station will not maintain or alter any item for which it is not rated and does not have the required technical data, equipment, material or trained personnel. (FAR 145.53)

2.0 PROCESS SPECIFICATION AUDIT

The repair station will accomplish an audit to substantiate and maintain capability in the following critical areas. Notwithstanding Part 145, these areas are housing, personnel, equipment and technical data.

Completed audit forms will be filed with the latest revision of the Controlled Capabilities List. Note that added capabilities will only be added to a new revision of the Controlled Capabilities List on a quarterly basis. Completed audit forms will serve as indication of repair station capability in between Controlled Capabilities List revisions.

The audit form must be completed showing justification and compliance with Part 145, subpart B prior to the repair station accepting component for maintenance or repair.

Later accepted revisions of items on the Controlled Capabilities List shall not require additional audit forms and can be worked on as necessary. The latest revisions of these items will be updated on the next revision of the Controlled Capabilities List. An additional audit form for an item is only required if the item is changing its Capability Category.

Capabilities Audit Form

Document Number: CAF001 Rev A

Log of Revisions

If revisions are required to this document, the entire document will be updated and re-released. As such, all pages will be at the revision level annotated in the table below. Any other changes to the document will be denoted by italics.

Rev	Affected Pages	Description	Date	Approval
IR	A1-A2	Initial Revision	11/11/14	K Nimmo
A	A1-A3	Updated blocks 1-15 and instructions for completing Capabilities Audit Form CAF001	5/12/15	K Nimmo

Instructions for completing Capabilities Audit Form (CAF001)

Fill out the following in accordance with the following:

- a) Block 1: Input OEM manufacturer.
- b) Block 2: Input OEM manufacturer part number(s).
- c) Block 3: Input REB Technologies, Inc. specification part number.
- d) Block 4: Check "Yes" box if specified criterion is met and list rating. Check "No" box if specified criterion is not met and discontinue completing form.
- e) Blocks 5-8: Check "Yes" box if specified criterion is met. Check "No" box if specified criterion is not met and discontinue completing form. All criteria must be met to add unit to capabilities list.
- f) Block 9: Input the document number, revision, and date for the document approved by the 8110-3. Note that approval for a REB Technologies, Inc. specification is usually part of an 8110-3 approval of a master drawing list (MDL).
- g) Block 10: Input the MIDO PMA supplement number, revision, and date.
- h) Block 11: Input the OEM manufacturer Component Maintenance Manual (CMM) document number, revision, and date.
- i) Block 12: Input the OEM and/or REB Technologies, Inc. specification document number(s), revision levels(s), and date(s).
- j) Block 13: Check the box whether this item will be added as full capabilities or lighting only.
- k) Block 14: Signature of Authorizing Manager/Supervisor
- l) Block 15: Date of signature.

CAPABILITIES AUDIT FORM (CAF001)	
1. OEM:	
2. OEM Part Number(s):	3. REB Number(s):
4. Does REB Tech have the appropriate rating in the Operation Specification for this item? If so, what is the rating?	<input type="checkbox"/> Yes <input type="checkbox"/> No Rating:
5. Does REB Tech have the appropriate housing and facilities for this item?	<input type="checkbox"/> Yes <input type="checkbox"/> No
6. Does REB Tech have the recommended tools, equipment and material or equivalent for this item?	<input type="checkbox"/> Yes <input type="checkbox"/> No
7. Does REB Tech have current technical data for this item?	<input type="checkbox"/> Yes <input type="checkbox"/> No
8. Does REB Tech have sufficient qualified personnel for this item?	<input type="checkbox"/> Yes <input type="checkbox"/> No
